New Wooden Prints From Petit Collage

We first told you about Petit Collage's prints on wood back in August, but there's some new additions to their line up. Check out their new monkeys and ladybugs after the jump!

Ads by Google

Each piece is printed on sustainably harvested wood veneer and best of all, they're on the affordable side. They're super cute and if they don't have a place in your nursery, could be a great fit for a friend as a shower gift! They range from \$15-\$55 (with framing).

- Ladybug Vine: starting at \$15.00, unframed.
- Monkey with Baby: starting at \$15.00, unframed.

Which one is your favorite? We're kind of partial to monkeys, but those lady bugs might have just won us over!
