

Bird Trio Mobile by Petit Collage

We've been noticing folksy, Pennsylvania Dutch motifs enjoying a small resurgence in the crafty world and this new mobile from Petit Collage fits right in with that aesthetic.

The birds are laser-cut from bamboo, a fast-growing, renewable wood and hang twenty inches all together.

We think this would look darling in the corner of a kitchen and could have a long, happy life beyond the nursery. The mobile costs \$76 at [Petit Collage](#) and is backordered until the end of July.
