Tape (and decorate!) in sticky style. Credit: [Petit Collage](#)

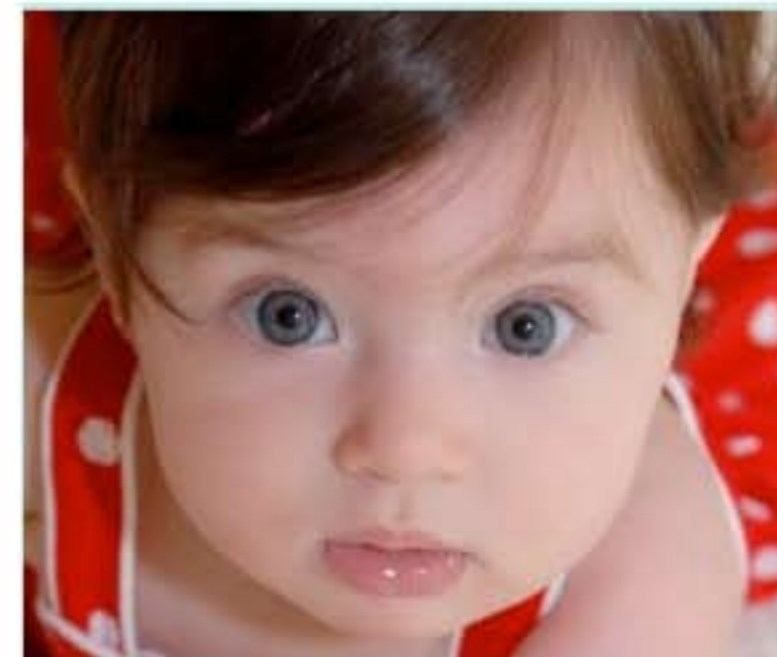

The graphic-design geniuses at [Petit Collage](#) have done it again. This decorative packing tape is just too cute. Sure it will elevate your packages from mundane to magical, but that's just the beginning. Use this insta-adornment to personalize school supplies like folders and binders, spruce up old furniture (try covering the top of a boring white dresser), or cut out the funny little creatures and stick them just about anywhere.

Available for \$8 at [Petit Collage](#).
